THE SFN-1.0 OVERWING DUST COVER for the 1" Round OPW 295 Series Aviation Fueling Nozzle Spout

The Fjord Aviation Products SFN-1.0 dust cover is designed for the 1" Round Nozzle Spout of the over wing OPW 295 Series Aviation Fueling Nozzle to keep air, water and dirt from entering the fuel system when not in use.

The SFN-1.0 is made of high impact absorbing urethane polymer that meets and exceeds FAA, Military and Commercial standards for protection and standard sealing qualities. This urethane polymer is chemical, UV and fuel resistant, flame retardant and with operating temperatures from -2° to 200° F. A urethane lanyard is attached as a standard part of the dust cover. An added bonus to the SFN-1.0 and lanyard being made of polymer instead of the OEM metal dust cover and "spring chain" is that any scratching, scraping or marring of any surfaces the nozzle cover might come in contact is prevented. Plus there is a choice of color— RED, BLUE OR BLACK!

Thus your "go to" Dust Cover for OPW 295 Series Aviation Fueling Nozzle 1" Round Spout is the SFN-1.0—the answer in keeping air, water, dirt or other contaminant intrusion from entering your fuel system, thus another aid in maintaining *clean dry fuel*.
