Want a pressure vacuum sealing dust cover for your 2-1/2" 3 lug fuel loading adapter? Look no further than the Fjord Aviation Products DC2.5/3-P. In addition to the standard sealing properties and positive locking of our DC2.5/3, the DC2.5/3-P features a *pressure sealing plug* over the SPR poppet area ensuring a positive poppet seal to prevent "poppet chatter"-keeping air and other contaminants from entering your fuel system.

Another added feature of the DC2.5/3-P is that it is excellent for interlock safety control.

As for durability, the DC2.5/3-P is made of high impact absorbing urethane which is chemical resistant, flame retardant and temperature resistant from -2° to 200°F. It also meets and exceeds FAA and Military standards for pressure sealing and standard sealing. This is your answer to keeping air, water and dirt from entering your fuel system during flow testing or when not in use.

Prevent air, water, dirt or other contaminant intrusion into your aviation fuel system with the DC2.5/3-P or the DC2.5/3 and help maintain *clean dry fuel*.

Just give us a call at 800-880-3535 or 281-334-4228 or email us at [clipper@fjordav.com](mailto:clipper@fjordav.com) for pricing and availability.
