## DC 2.0 Dust Cover for the 2" Fuel Loading Adapter

What are you waiting on? The best dust cover for the 2" OPW Kamvalok Dry Break Loading Adapter, the Fjord Aviation Products DC 2.0. Why is it the best? Simple. It covers most of the adapter, not just the poppet area, thus sealing and protecting your fuel system from contaminants, water and moisture that can accumulate on the adapter after refueling your truck possibly contaminating the fuel. Another added feature of the DC 2.0 is that it works great with the safety interlock control system.

As for durability, the DC 2.0 is made of high impact absorbing urethane which is chemical resistant, flame retardant and temperature resistant from -2° to 200°F. It also meets and exceeds FAA, military and commercial standards for sealing capabilities.

This is your answer in preventing water, dirt or other contaminant intrusion from entering your fuel truck from the 2" loading adapter when not in use –Fjord Aviation Products DC 2.0 and *"help maintain clean dry fuel."*
