## MODEL FHP-XXX HOSE PROTECTOR BANDS

Chafing hose a problem? Check out the Fjord Aviation Products Hose Protector Bands for a solution.

Each Fjord Aviation Products' Hose Protector Band fits around the hose (only on the portion of the hose that is in contact with the ground) and is placed every 3 to 4 feet lifting that portion of the hose ever so slightly off the ground resulting in reduced wear.

Ideal locations for using these Hose Protector Bands are at fill stands, offloading headers or anywhere that long heavy hoses are being dragged across the ground. An added bonus is that the friction from dragging these long heavy hoses is reduced since the Hose Protector Band is in contact with the ground not the hose making it easier to drag.

These Hose Protector Bands are made to order and fit hoses from 1.5" ID to 4" ID. The exact part number is determined by the size of the hose, for example if Hose Protector Bands are to be used on a 3" hose then the part number is FHP-3.0 (FHP-XXX). Each Hose Protector Band comes with 2 cable ties for securing the band to the hose as well as detailed installation instructions.

Each Hose Protector Band is made of durable, impact absorbing Urethane polymer and is UV, fuel, chemical resistant, non-combustible and are high visibility orange for added visual safety.
